## 第 4 次平时作业

```
System.out.println(this.hashCode()+" "+this.toString());
public static Monitor getSingleMonitor() {
   return buildSingleMonitor.monitor;
```

```
package work4;

/* 测试类,打印信息,进行单例对象校验*/
public class SingleObjectTest {

   public static void main(String[] args) {
        /* 打印检验信息*/
        Monitor testOne = Monitor.getSingleMonitor();
        Monitor testTwo = Monitor.getSingleMonitor();
        testOne.getInfo();
        testTwo.getInfo();
        System.out.println(testOne==testTwo);
```

```
/* 可以发现实例化的对象,哈希码 地址 都是一样样的*/
}
```
